EXPERIENCE

Software Engineer

Aug 2024 – Present

Society of Hispanic Professional Engineers, Georgia State University

Atlanta, GA

- Collaborated with the SHPE GSU web development team to launch the chapter's online presence, implementing JSON-LD schema for improved search visibility; increased exposure to companies and secured \$1,500 in sponsorships across a 124-member chapter.
- Organized a chapter hackathon with 100+ attendees and 7+ sponsors, coordinating logistics, sponsor outreach, and event operations end to end.
- Designed and coordinated 12+ Arduino projects (radar with ultrasonic sensors, false Wi-Fi for cybersecurity, RFID security check) using C++ and Python to teach microcontroller concepts, resulting in a 25% increase in member retention.

Event Manager

Jan 2026 – Present

Society of Hispanic Professional Engineers, Georgia State University

Atlanta, GA

- Coordinated logistics and planning for SHPE chapter events, managing vendor communications and registration processes.
- Completed critical administrative paperwork and applications during leadership gaps, ensuring events proceeded on schedule.

Team Supervisor

Jun 2018 – Jan 2026

Chick-fil-A

Conyers, GA

- Directed operations for 14-16 personnel using targeted training programs to enhance performance metrics.
- Organized over 200 complex catering orders, achieving a customer satisfaction rate of 95%.
- Established and tracked performance metrics, resulting in a 10% increase in Customer Experience scores through focused Monday initiatives.

PROJECTS

Application Tracker <https://application-tracker-livid.vercel.app/login>

Aug 2026

Next.js, TypeScript, Supabase, Google Gemini API, Vercel

- Built and deployed a full-stack job application tracker that extracts structured data from screenshotted job postings using Gemini 2.5 Flash vision, with an editable confirmation step before saving.
- Designed a Postgres schema in Supabase with row-level security and a cron-driven job that sends localized deadline-reminder emails via Resend.
- Migrated authentication from Clerk to Supabase Auth (email/password and Google OAuth), rewriting middleware-based route protection and building a full password-reset flow.

EMF Camp Website

Aug 2026

Flask, Jinja2, JavaScript, pytest, GitHub Codespaces

- Contributed to an open source event management platform used by 3,000+ festival attendees, fixing a UX issue where volunteer shift filters incorrectly hid shifts users had signed up for.
- Navigated an unfamiliar full-stack codebase (Flask routes, Jinja templates, JavaScript filtering logic) to identify root cause and implement a targeted fix following existing project conventions.
- Responded to maintainer code review feedback, revised approach, and added unit tests using Flask's `render_template_string`; all tests passing across a 151-test suite.

SKILLS

Languages: JavaScript/TypeScript, Python, SQL (Postgres), Java, C, HTML/CSS

Frameworks: React, Next.js, Node.js, Flask

Developer Tools: Git, Docker, Supabase, Google Cloud Platform, VS Code, PyCharm

EDUCATION

Georgia State University

Atlanta, GA

Bachelor of Science in Computer Science.

Dec 2027

Relevant Coursework: Data Structures & Algorithms, Design & Analysis of Algorithms, Operating Systems, Database Systems (in progress), Machine Learning (in progress), Intro to Robotics (in progress), Automata (in progress)
